Banner Ad Policies/Guidelines:

- › We review your advertising submissions to optimize your creative materials for our audience experience.
- › Our staff will work with you to make sure you get the most value out of your advertising opportunity.
- › We reserve the right to ask you to edit your creative to meet our editorial and creative guidelines if necessary.
- › All ad media should be sent to ads@ehpub.com. Multiple people monitor this email and ensure your ad campaign is deployed as scheduled.
- › We require at least 3 days lead time for static image-based ads, and 7 days lead time to for any HTML 5 or Rich Media-based ads.
- › Please supply a 320 x 50 mobile ad unit for backup on a mobile device jpg format preferred.
- › Please be sure to include the URL for click-throughs from your ads, even if the URL is embedded in your ad units themselves
- › Please allow additional lead time when changing ad creatives during your campaign run.

Our Ad Server:

- › All ads are served by Google Ad Manager (formerly DART)

Supported Ads:

We currently support the following IAB standard units:

Standard Support:

- › Leaderboard: 728px wide x 90px tall
- › Rectangles: 300px wide x 250px tall

Advanced Support:

- › Super Leaderboard: 970px wide x 90px tall
- › Billboard: 978px wide x 250px tall (Should not be larger than 50K for Static Ad)
- › Half-Page: 300px wide x 600px tall (only supported in rectangle position 2)
- › Jumbo Pre/Interstitial Unit: 640px tall x 480px wide that appears before or between user page views and is served at the interval of one per user per day
- › Rich Media Ads: Available in all positions, see creative guidelines grid below
- › Expanding Ad Units: Get more impact with your ads. Provide us with a 728 x 90 and a 728 x 315 and we'll create a rich media expandable ad unit for you. When users click the expand area in your leaderboard, the ad unit expands to 728 x 315 to display even more information! (available on desktop and tablet only, provide a 300 x 50 static mobile ad unit for mobile views).
- › Bottom Takeover

Billboard Ad Unit
978 x 250 px

Super Leaderboard Ad Unit
970 x 90 px

Standard Leaderboard Ad Unit
728 x 90 px

Half Page
300 x 600 px

Jumbostitial Ad Unit
640 x 480 px

Standard Rectangle
300 x 250 px

ONLINE SPECS

CREATIVE SPECIFICATIONS FOR BANNERS:

We provide specifications for both standard static image based creatives and rich media ad creatives. Email all ads to jeff.miller@emeraldexpo.com

STANDARD STATIC IMAGE BASED AD CREATIVE SPECIFICATIONS*

Unit/ Dimensions	File Types	Max File Size	Notes
Leaderboard 728 x 90px	.jpg, .gif, .png	40kb	Animated GIF-based creatives may only loop 3 times
Rectangle 300 x 250px	.jpg, .gif, .png	40kb	Animated GIF-based creatives may only loop 3 times This ad unit also appears on mobile at proper dimensions
Super Leaderboard 970 x 90px	.jpg, .gif, .png	40kb	Animated GIF-based creatives may only loop 3 times
Half Page 300 x 600px	.jpg, .gif, .png	40kb	Animated GIF-based creatives may only loop 3 times This ad unit also appears on mobile at proper dimensions
Pre/Interstitial 640 x 480px	.jpg, .gif, .png	40kb	We only accept static images for this larger ad unit. This ad unit will be resized appropriately on mobile for viewing
Mobile Leaderboard 320 x 50px	.jpg, .gif, .png	40kb	Animated GIF-based creatives may only loop 3 times This ad unit only appears on mobile devices

We support Ad Tags From Most 3rd Party Servers Including: DoubleClick(DART), Atlas, Sizmek, FlashTalking, and more...

Note about Mobile Responsiveness:

Our website are now mobile responsive, automatically resizing the display based on the device. With standard JPEG, GIF, and PNG based ad media, the ads will automatically respond and resize themselves to be viewed properly on mobile and tablet devices. However, HTML5, rich media, and some 3rd party provided ad unit don't always respond properly. Please test your creatives for responsiveness prior to submission to us. If you cannot get your rich media units to respond, please also submit a static JPEG, GIF or PNG as a backup unit to be displayed on mobile devices.

Optimization of HTML 5 Ads

For best user experience:

- › Combine all supporting files e.g. JavaScript toolkits, libraries, Fonts, HTML, and CSS whenever possible.
- › Consolidate images wherever possible.
- › Be sure the clickable element(s) are set properly.
- › Package assets to allow for maintaining a persistent connection.
- › All assets and files should be delivered using relative paths.
- › Use compression where applicable to minimize the file load size.
- › Caching- Use CDN-hosted files and caching of static objects as much as possible.
- › Provide inline CSS and use HTML to deliver initial display resources as much as possible. Limit initial dependencies on any render-blocking .js or .css.
- › Load interactive elements as a deferred or secondary subload, but keep them efficient using techniques such as caching.
- › Defer heavy file weights until user initiates interaction.
- › HTML5 does not support streaming video, but it can simulate a streaming experience using adaptive bitrate streaming technologies such as HLS and MPEG-DASH.
- › HTML5 Created in Google Designer or Adobe Edge may require additional lead time for us to test and optimize for delivery.

RICH MEDIA BASED AD CREATIVE SPECIFICATIONS*

Unit/ Dimensions	Rich Media Types	File Initial Load	Max Polite Load	Max User Initiated	Other
Leaderboard 728 x 90px	HTML5, 3 rd Party Served	40kb	100kb	Unlimited for streaming media from 3 rd party served ads	15 sec max for animation, 30 secs max for 3 rd party Video, user initiated audio, expandable to 728 x 180px
